

4 psychological ways a hacker attacks

Cybercrime has risen exponentially this year. Could you spot the signs of an attack or prevent one before it happens? Use our step by step infographic to understand the psychological process a 'people hacker' uses when exploiting employees...

3 tips for dealing with a suspicious email:

- Always check the sender's email address
- Be wary of emails asking you to send credentials or details.
- Pick up the phone if its payment related!
