

Surface as a Service

Surface as a Service is an **innovative & affordable** way of providing your users with the technology they need to do their best work.

Surface is a range of multifunctional devices and accessories from Microsoft. Designed for the modern workplace, Surface tablets and laptops give your people the freedom and protection to work from anywhere.

What is Surface as a Service?

Surface devices are offered as a service to help mitigate the costs and risks associated with deploying multiple personal devices.

Hardware, software, and IT support services are all included in one subscription fee.

Each device is configured with policies and software for your organisation. All the setup is handled by our team so that when a Surface device is unboxed by your users it is ready to go.

Once unboxed, our Cloud IT Support provides access to our service desk team to support you and your end users. This includes security updates and device replacement in the event of being lost or stolen – you are covered for all your device cycle management needs.

Our Cloud IT support

- ITIL award-winning service desk
- Service desk portal, email and telephone support
- Dedicated Technical Support Engineer
- Microsoft Gold Partner

Benefits of Surface as a Service

- **Financial flexibility.** Surface as a Service lowers the barrier to entry by shifting the financial investment from a capital expenditure to an operational expenditure.
- **Predictable costs.** Roll your hardware, software, cloud and support bills into one fixed monthly cost, making it easier to manage your IT budget and forecast for the future.
- **Rapid on boarding.** Simply select your Microsoft Surface devices and accessories, choose your Microsoft Cloud Package & insurance, and decide on the level of Cloud IT Support you require.
- **Always up to date.** You will receive the latest software upgrades with lower overhead cost, and can choose to have the latest device offering.
- **Secure.** Surface as a Service includes enhanced EM+S to provide protection wherever your users are working.
- **Fully managed.** A lifecycle solution covering device management and end user support.
- **170% ROI over 3 years.** Predicted ROI according to Forrester Research on behalf of Microsoft, July 2020.
