

365 Licence Health Check

Get insights into your organisation's **Microsoft 365 consumption** and **identify cost optimisation opportunities** with a free Microsoft 365 licence health check.

Using remote data analysis and the expertise of our Microsoft 365 team, Cloud Business' licensing health check identifies Microsoft 365 over-provisioning and uncovers licence cost optimisation & technology adoption opportunities.

How does it work?

It is a simple three step process which our Microsoft 365 experts run remotely:

Discover

We collate tenant-level data remotely, providing a 12 month snapshot of your 365 usage

Analyse

Our 365 experts assess the data and compile licensing and consumption insights

Report

You receive a report including our cost optimisation & technology adoption recommendations

Discover if your organisation is over-provisioned or whether you are failing to leverage significant usage rights because you don't even know you have them.

Health check benefits

A Microsoft 365 licence health check can help you:

- Get visibility on Microsoft 365 consumption
- Identify opportunities to reduce costs and software wastage
- Assess licence compliance health
- Explore subscription reprofiling opportunities
- Increase technology adoption
- Prevent subscription creep
- Assess whether your current license estate is fit for purpose
- Align 365 licensing with strategic objectives

Microsoft Gold Partner
